**Position Qualifications and Responsibilities for
Zonia Mine Site Maintenance Manager (Yarnell, AZ)**

We are searching for a specialist who has experience with on-site maintenance for a shut-in mine on maintenance with some exploration activities. Permits are in place for containment of stormwater and sediments and has the necessary berms, basins and containment areas in place for that purpose. The site is located in Arizona, approximately half-way between Prescott and Wickenburg off Highway 89, six miles paved for 3 miles on well maintained ranch roads for the balance.

Individual should have ability to complete maintenance activities that include:

- Inspection of site facilities, leach pads, waste rock dumps, water and sediment containment areas,
- Inspection and maintenance of pumps, water lines;
- Maintenance of mine roads and berms on site with use of backhoe on site;
- Ability to repair water lines with HDPE pipe and use of electrofusion repair equipment;
- Operate some equipment such as portable generators, lift truck, electrical connections and ability to operate backhoe and medium size cat beneficial;
- General maintenance of shop equipment and facilities; and
- Use of outside contractor for tasks outside the individuals abilities.

Position will be flexible full-time, employee will determine what days are most beneficial to accomplish the tasks with a minimum of 4-5 days in any week.

Experience should include prior work that consisted of the activities required on-site, with positive references from past employers.

There is an existing site manager who will be available to provide help and advice to understand the duties and responsibilities for as long as necessary.

Compensation will be based on current market rates and commensurate with experience and ability.
