- Mr. Yamashiro served as a Subject Matter Expert on potential releases and risk evaluation for the Keystone XL Supplemental EIS, working under the direction of the US Department of State. For over 30 years he has principally been involved in environmental consulting that specializes in the assessment, risk ranking, and remediation of assets affected by client activities in the United States, Europe, Africa, and Latin America. For these projects, he has worked with clients to evaluate enterprise and health risk, liability, and compliance for pipelines, refineries, chemical plants, and terminals while focusing on reliability and safety.
- Mr. Yamashiro has completed numerous evaluations on incident risk and potential impact to High Consequence Areas and has lead and authored numerous reliability and safety reports and environmental impact studies to federal and state agencies.
