Environmental Engineering Specialist 3 Underground Storage Tank WASTE PROGRAMS DIVISION

JOB SUMMARY

At ADEQ, our vision is to be the number one state in the nation in balanced, leading-edge environmental protection; through technical and operational excellence; and radical simplicity for customers and staff. We are currently looking for an employee who is committed to our Agency, passionate to excel in their career and engaged in our mission. Only this caliber of employee will be successful in driving our Agency towards accomplishing our vision.

We are looking for engineers to help drive our agency towards accomplishing our vision. This position will support the Project Managers by conducting technical reviews for soil and groundwater remediation sites, and ensures appropriate and aggressive remediation technologies are being implemented at leaking UST sites. You will also serve a mentor to junior level engineering staff, and help to reduce the routine technical review burden on higher-level engineers. This is an excellent opportunity for someone who is looking to expand and grow his or her career through our Career Path progression tracks.

Do you think you have the combination of commitment, passion, and talent to help drive this Agency to realizing our vision? If so, **apply today**. To learn more about us, our organizational habits known as the ADEQ Way, our culture, and other positions we have open, visit us at [DEQ/careers](#)

MINIMUM REQUIREMENTS

- Bachelor's degree in environmental/chemical engineering or other engineering discipline
- Requires 5 years' experience (Master's degree can substitute for 2 years of experience; Doctorate can substitute for 4 years of experience). Engineer in Training (E.I.T) certification is required and Professional Engineering (PE) certification is preferred through the AZ Board of Technical Registration or an equivalent organization in a reciprocal jurisdiction.
- Knowledge of subsurface contaminant remediation, Feasibility Studies, and remedial design at leaking UST sites; wide range of knowledge with various contaminant constituents including fuels and VOCs; knowledge of groundwater plumes, system operation and maintenance, vapor intrusion; principles of ground and surface water flow; principles of fate and transport of chemicals in ground and surface water; State and Federal environmental regulations.
- Ability to understand and apply environmental rules and statutes; to follow guidance documents, standard operating procedures, and other technical instructions in performance of tasks; balance, prioritize and organize multiple tasks and complete assignments by applicable deadlines; to prepare clear, concise and accurate reports; remedial engineering cost estimates, remediation design calculations for mass removal, and to summarize completed tasks and/or monitoring data orally and in written communication

BENEFITS

Among the many benefits of a career with the State of Arizona, there are:

- 10 paid holidays per year
- Accrual of sick and annual leave beginning at 12 and 13 days per year respectively for full-time employees
- A top-ranked [retirement program](#) with lifetime pension benefits

- A [robust and affordable insurance](#) plan to include medical, dental, life, short-term and long-term disability
- An incentivized [commuter club](#) and public transportation [subsidy program](#)
- We promote the importance of work/life balance by offering workplace flexibility
- We offer a variety of learning and career development opportunities
