

STAFF/PROJECT SCIENTIST

Opened Feb-13-2020

Until Position is Filled

Adams and Wendt, Inc. has an opening for a Staff or Project Level Scientist in our Mesa, Arizona office to assist with our growing work load in environmental consulting services, including but not limited to: soils investigations; Phase I ESAs; industrial hygiene/IAQ, Phase II ESAs; asbestos and lead paint inspections, abatement oversight and clearances; groundwater studies; remediation of contaminants in soil and groundwater; and general environmental consulting services. This position requires three or more years of environmental consulting or closely related experience. Current 40-hour HAZWOPER certification, asbestos and/or lead inspector certifications, and technical writing skills are preferred. A current, or qualifications and desire to obtain, professional registration is a plus. Based on the applicant's capabilities, the selected individual may be responsible to be a client liaison, develop reports and proposals for work activities. The selected applicant will perform field investigations, environmental assessments; remediation operations; UST closure, investigation and remediation activities; soil, water and vapor sampling; management of data, and report writing. Acceptance of additional project-related responsibilities will be expected of more qualified candidates.

Adams and Wendt offers a competitive employee benefit package, including medical, dental, disability and life insurance, and a 401K savings plan. Salary will be commensurate with experience.

All interested parties should send your resume to:
