

PROJECT-LEVEL ENVIRONMENTAL PROFESSIONAL

Job Description:

Ninyo & Moore Geotechnical & Environmental Sciences Consultants has an immediate opening in our Phoenix and Tucson, Arizona offices for a Project-Level Environmental Professional. The successful candidate will be responsible for conducting and overseeing environmental site assessments (Phase I and II ESAs), facility investigations, other hazardous waste site investigations, and technical report writing. Other job duties may include: establishing project objectives, procedures and performance standards, and leading multi-disciplinary teams on site reconnaissance; soil and groundwater sampling, well installation, air monitoring, and various office tasks, phone/email oversight and management of subcontractors/vendors, and management of project budgets.

Education:

Bachelor's Degree in Geology, Environmental Science, Engineering, or related field required.

Master's Degree in Geology, Environmental Science, Engineering, or related field a plus.

Certification:

Current 40-Hour HAZWOPER, ASTM Environmental Professional (EP) (EPA 40 CFR 312.10), Certified Hazardous Materials Manager (CHMM), Professional Engineer (PE), Geologist in Training/Registered/Professional Geologist (GIT/RG/PG), EPA Lead Inspector, EPA Lead Risk Assessor, AHERA Building Inspector, AHERA Management Planner, Project Management Professional (PMP), and/or other industry-relevant certification preferred. Valid driver's license and clean driving history.

Required skills:

Three to eight years of experience performing most or all of the tasks listed above with at least one year of managing and/or coordinating project budgets and staff. Candidate must also have solid base writing skills, attention to detail, effective inter-communication skills, familiarity with Phase I (ASTM E1527-21), Phase II (ASTM E1903),

and ability to work independently when required. Collaboration with technical staff on reports and field assignments, and preparation of technical report deliverables, is a must. Mentor and provide direct, hands-on assistance when teaching verbal and written skills to staff environmental professionals.

Preferred Skills:

Candidate should have experience providing aforementioned services on a wide variety of sites for clients including public agencies, governments, utilities and private industry (local experience preferred). Experience performing industrial hygiene services (asbestos, lead-based paint, indoor air quality, mold) is a plus. Oversight and training of staff and prior work history with a consulting firm preferred.
