

Terranext, Staff or Project Level Engineer or Scientist, Posted 2/9/2021

Terranext, LLC has an opening for a Staff or Project Level Engineer or Scientist in our Tempe, Arizona office. Terranext provides a rewarding, flexible work environment that encourages individual responsibility in a small, but growth-oriented office.

This position requires a BA, BS or MS degree and two to ten years of environmental consulting or closely related experience. Current 40-hour HAZWOPER certification is required, technical writing skills and/or project coordination experience preferred, and professional registration a plus. Based on capabilities, the selected individual will be responsible for field and office activities statewide that include environmental assessments; remediation system operations; soil, water and vapor sampling; data management, and report writing. Acceptance of additional project-related responsibilities will be expected of more qualified candidates.

Terranext offers a competitive employee benefit package, including medical, dental, disability and life insurance, and a 401K savings plan. Terranext is an EOE/AA employer. Salary will be commensurate with qualifications and experience.

Interested applicants should e-mail a resume to:
